EXPERIENCE

- ❖ **Software Development Intern | LetsUpgrade (LISA Program)** (1/07/25 - 1/06/26)
 - Developed and iteratively optimized **3 full-stack versions** of the same web application, refining UI/UX, backend architecture, and overall application performance.
 - Built **14+ feature-rich frontend and backend pages**, implementing responsive interfaces and scalable backend functionality.
 - Integrated RESTful APIs to enable efficient data flow and seamless frontend-backend communication.
 - Collaborated in an Agile development environment, contributing to sprint planning, feature implementation, testing, and code reviews.
 - Utilized Git and GitHub for version control, collaborative development, and branch management.
 - Leveraged AI-assisted development tools, including ChatGPT and Cursor, to accelerate development, debugging, and code optimization.
 - Performed testing and debugging to improve application reliability, maintainability, and code quality.

ACADEMIC PROJECTS

- ❖ **Deepfake Detection Platform**

Tech Stack: React.js, Node.js, Python, REST APIs

Developed a full-stack AI-powered web application to detect manipulated images and videos. Built a responsive frontend, integrated REST APIs with a deep learning model for real-time detection, and optimized the application for accurate and efficient predictions.

❖ **ReadWise AI**

Tech Stack: React.js, [Node.js](#), [Express.js](#), Ollama API, REST APIs

Developed a full-stack AI-powered application that generates concise summaries and key insights from articles and documents. Integrated LLM APIs to provide intelligent content analysis through a responsive full-stack web interface, improving information retrieval and user productivity
